

Four outstanding resources for keeping up in endocrinology

The Journals of The Endocrine Society

1 MOLECULAR ENDOCRINOLOGY **NEW**

Editor: *E. Brad Thompson, M.D.*

A journal devoted to the molecular mechanisms of cellular regulation. This new interdisciplinary journal will supply a forum for the increasing number of scientists working on molecular mechanisms of hormone action.

In general terms, it will include prompt publication of studies which involve the investigation of cloned genes and gene fragments relevant to hormone action, as well as investigations of receptor and second messenger systems at the molecular level.

It will also include work on closely related molecules such as lymphokines and oncogenes. Although work on such molecules is not traditionally endocrinology, the mechanisms being uncovered obviously interdigitate with classic endocrinology. Being able to study and compare these mechanisms and functions will aid in the progress toward understanding the universality of cell signalling systems. **Monthly.**

Non-members: \$90/year In-training: \$50/year Institutional: \$145/year (Add \$20/year outside the U.S.)

2 ENDOCRINOLOGY

Editor: *P. Michael Conn, Ph.D.*

Endocrinology publishes the best papers in the field, recording advances in the fundamental knowledge of the endocrine glands and their hormones. An author, title, and in-depth subject index are published in the June and December issues. **Monthly.**

Non-members: \$90/year In-training: \$45/year Institutional: \$145/year (Add \$35/year outside the U.S.)

3 JOURNAL OF CLINICAL ENDOCRINOLOGY & METABOLISM

Editor-in-Chief: *Robert D. Utiger, M.D.*

The **Journal of Clinical Endocrinology and Metabolism** is the clinical counterpart of **Endocrinology**. Original papers on endocrine and metabolic studies are published every month to bring you the latest relevant information on human and primate physiology and disease.

Each issue also contains announcements of coming events and symposia as well as placement service for The Endocrine Society listing job opportunities and positions wanted. Author, title, and in-depth subject indexes are included twice each year.

Everyone with an interest in endocrinology will want to stay informed with this authoritative and up-to-date source. **Monthly.**

Non-members: \$85/year In-training: \$45/year Institutional: \$125/year (Add \$30/year outside the U.S.)

4 ENDOCRINE REVIEWS

Editor: *Pentti Siiteri, Ph.D.*

Endocrine Reviews brings you a unique blend of clinical and experimental endocrinology. This fast-moving field requires professional media that can keep up with the pace. **Endocrine Reviews** does just that... and more.

Nowhere else will you find the same thoughtful blend of clinical and experimental material in a single source. And **Endocrine Reviews** offers its readers something extra: the chance to be part of the editorial decision-making process. Readers will be asked to suggest prospective authors and to submit their own manuscripts.

Endocrine Reviews is a journal of thought—and its applications. Depend on it for the best of both clinical and experimental endocrinology. **Quarterly.**

Non-members: \$45/year In-training: \$30/year Institutional: \$60/year (Add \$10/year outside the U.S.)

EASY ORDERING

Call us **FREE** to place your subscription to any of these journals. Call 1-800-638-6423 from anywhere in the U.S. except Alaska. In Maryland, call collect at 528-4105.

For mail orders, just specify your journal and rate... we'll bill you later. Mail your orders to:
Williams & Wilkins, P.O. Box 23291, Baltimore, MD 21202.

Endocrine Society Members

Member rates are available through separate order and payment to:

NEW

Cut your AIDS literature search time from days to hours...

ATIN: AIDS Targeted Information Newsletter

Sponsored by The American Foundation for AIDS Research

Organized to save you time

ATIN: AIDS TARGETED INFORMATION NEWSLETTER is designed to *target* important AIDS literature and organize it for you in a form you can rapidly assimilate and use. Each monthly issue's abstracts and citations are sorted into **8 KEY AREAS OF STUDY**:

- MOLECULAR VIROLOGICAL
- IMMUNOLOGICAL EPIDEMIOLOGICAL
- CLINICAL TREATMENT ASSAY METHODS PUBLIC POLICY: SOCIAL, ETHICAL & LEGAL CONCERNS

Review literature published just weeks before

ATIN turns information around at an incredible pace. The articles abstracted and cited in a given issue of ATIN are only a month — sometimes weeks — old. With ATIN, you'll have a truly up-to-date survey of each month's AIDS literature.

Get nearly 300 citations per issue — and abstracts of key articles

The editors of ATIN review the contents of more than 100 journals for every issue. You'll find nearly 300 cita-

tions every month, more than any other source, along with abstracts of the most significant articles.

ATIN puts current AIDS research in perspective

And with this AIDS newsletter you also get comments from the distinguished researchers and clinicians who make up our Editorial Advisory Board. These experts will alert you to key findings, questionable data, first cases, and more. Each issue also includes one or two mini-reviews that will put you at the forefront of new developments in AIDS research.

Managing Editor: Russell E. MacDonald, PhD
Associate Editors: Jeffrey Laurence, MD; Jonathan W. M. Gold, MD; Craig Metroka, MD, PhD; Lee Ratner, MD, PhD; James Allen, MD, MPH

Send now for ATIN: AIDS TARGETED INFORMATION NEWSLETTER. Use the handy coupon below. Or for even faster service, call toll-free 1-800-638-6423. Order today from anywhere in the U.S. except Alaska. In Maryland, call collect 528-4105.

A NEW journal devoted to the molecular mechanisms of cellular regulation

MOLECULAR ENDOCRINOLOGY

A Journal of The Endocrine Society

Monthly—premier issue January 1987

MOLECULAR ENDOCRINOLOGY is a new interdisciplinary journal supplementing **ENDOCRINOLOGY** and the other successful journals of The Endocrine Society. This international journal supplies a forum for the increasing number of scientists working on molecular mechanisms of hormone action. In general terms, it includes prompt publication of studies which involve the investigation of cloned genes and gene fragments relevant to hormone action as well as investigations of receptor and second messenger systems at the molecular level. It also includes work on closely related molecules such as lymphokines and oncogenes. Although work on such molecules is not traditional endocrinology, the mechanisms being uncovered obviously interdigitate with classic endocrinology. Being able to study and compare these mechanisms and functions will aid the progress toward understanding the universality of cell signalling systems.

Keep up with research being conducted today. **MOLECULAR ENDOCRINOLOGY** receives manuscripts from leaders in their fields including

• **Daryl K. Granner** • **Thomas D. Gelehrter** • **Bert W. O'Malley**
• **Isidore S. Edelman** • **Anthony R. Means**

Editor-in-Chief: E. Brad Thompson

Editors: Joel F. Habener, Anthony R. Means, Gordon M. Ringold, Michael G. Rosenfeld

Editorial Board: Stuart A. Aaronson, F. Carter Bancroft, Mariano Barbacid, Miguel Beato, Suzanne Bourgeois, Henry Bourne, Darrell H. Carney, Pierre Chambon, P. Michael Conn, Priscilla S. Dannies, Daryl K. Granner, Bernd Groner, Jan-Ake Gustafsson, Tony Hunter, Michael Karin, Marc E. Lippman, Richard E. Mains, Harold L. Moses, Malcolm G. Parker, Jeffrey M. Rosen, William J. Rutter, Herbert H. Samuels, E. Aubrey Thompson, Jr., Lewis T. Williams
